WORK EXPERIENCE

Mobile Engineer

Mahatma Education Society

01/2022 - Present

Mumbai, India

Achievements/Tasks

- Working on a mobile application for students to contribute in college's events and activities, in Agile method.
- Used Flutter for screens, integrated APIs from Flask backend, and used MongoDB to store the data.
- According to students' contributions, they will earn points. These points could be used to buy courses and food.
- Worked on integrating online payment within the app, using RazorPay.

Contact : Dhiraj Amin (mentor) - +91 99606 71063

Backend Software Engineer BeelT

06/2021 - 09/2021

Novi Sad, Serbia

PERSONAL PROJECTS

Personal Website (04/2022 - 05/2022)

- Worked on my personal website resume, to highlight my skills and my portfolio.
- Used ReactJS and React Hooks.
- www.chadiayari.com

Chat Application (11/2021 - 12/2021)

- Created a user friendly design, inspired by Facebook Messenger app, using Adobe XD.
- Created the front-end using Flutter, giving users the ability to add and text other users, as well as creating group chats.
- Created the backend using Firebase and Firestore.

EventHub (09/2021 - 10/2021)

- Encountered difficulties while organising a conference, so I built a web app that creates online events, while choosing events' places and logistics.
- Created using ReactJS, NodeJS and MongoDB.
- Encountered issues with collecting logistics data, so I created a Maps Web-scraping function via Selenium Python.
